

Shuffleboard Care and Maintenance

Before waxing a board for the first time, it should be cleaned with Triple Crown Cleaner Polish. This product is designed to remove foreign matter from the surface of the board.

1. Apply Triple Crown Cleaner Polish with a towel. Before the surface dries, buff lightly using a dry towel. This should be repeated 2 to 3 times a week depending on how often the board is used.
2. Triple Crown Liquid Wax should also be applied with a towel. Application for the wax is identical to application of the polish. Repeat instructions above, buffing lightly with a dry towel until the surface is as smooth as ice. Once again, depending on the use of the board 2 to 3 times per week is usually recommended.
3. For ULTIMATE SPEED you may now apply Triple Crown Silicone Spray. Apply and let it set for 15 minutes before buffing lightly.

DO NOT try to improve on these instructions by allowing to dry or by using a buffer!

DO NOT use furniture polish or silicone spray that is not specifically for shuffleboards.

For best results follow the above instructions. You are now ready to apply Triple Crown Speed Powder.

We carry the following Triple Crown products. See details on our website: www.united420.com
